City Hall Project

This illustration portrays relocating City Hall to the adjacent property. Landscape improvements to the site anchor the building and strengthen the new civic use of the structure.

Above - Plan view for relocating City Hall

Left - Vignette of the entry to the newly created pocket park. Adding greenspace in the downtown district is an important feature and will benefit the community for years to come.

Phase two of the City Hall Project is to restore the building to its original historic manner.
FIGURE GROUND STUDY: PROPOSED.

EXISTING BLOCKS
PROPOSED INFILL
GREEN SPACE
Accentuating the natural topography of the site allows for the addition of amenities such as picnic areas and walking trails throughout the campus.

This multiuse professional center that can house events and serves as a management center for the entire site.
