Cubby holes will allow the children to store their belongings while playing at the Splash Pad. Providing benches here gives them a place to sit and put their shoes back on, or rest. The planters will cool the area off by the added vegetation. It will also give a small barrier between the places to play and rest.

This vegetation plan evokes a feeling of a tropical oasis on a hot summer day. The tropical varieties provide a sense of enclosure without losing any views to the surrounding park areas.
