EDUCATION FOR A QUALITY WORKFORCE

Education is considered to be a major driver in developing and retaining a qualified workforce in Griffin+Spalding County. A key initiative that has stemmed from this priority includes the Zero-to-Five initiative which is led by the Griffin+Spalding School System. This programming has become a successful example for other communities on how to engage daycare providers in the education pipeline, provide informational materials to new parents through a partnership with Wellstar Spalding Regional and the Housing Authority, and a revitalized tutoring program.

These efforts help to inform and guide the Joint Strategic Planning process.

INTERGOVERNMENTAL COLLABORATION

**3G Meetings
Annual Workshop
Joint Strategic Planning**

Carl Vinson Institute of Government

This is a key priority for the Griffin+Spalding Archway Executive Committee and our three funding partners. This priority is supported through facilitating regular meetings between the City of Griffin, Spalding County and the Board of Education, as well as an annual intergovernmental work session. These events, while critical and successful themselves, have also led to the support of the poverty informed community-wide training session, the newly created poverty informed taskforce, and the revitalization of the Griffin+Spalding Ministerial Alliance.

The largest project for the Griffin+Spalding Archway Partnership this past year has been the joint strategic planning process between the City of Griffin, Spalding County, and the Griffin+Spalding County Schools. This work, led by CVIOG, began in the summer of 2020 and will be complete by the summer of 2021.
