CERTIFIED GOLD

Washington County earned their silver and gold designations as part of the Connected Resilient Communities program. These designations mark the completion of two projects: a community health assessment and the addition of electric vehicle charging stations.

PRIORITY AREAS

1. Education and Workforce Development
2. Healthcare and Community Wellness
3. Creating a Vibrant, Live-able Community
4. Generational Poverty

TENNILLE PEDESTRIAN BRIDGE

As the City of Tennille continues to grow and develop, the need for a pedestrian bridge to connect both sides of the railroad has become a community focus. Students from the College of Engineering designed a bridge that meets all railroad requirements while being a beautiful architectural design for the community, allowing for ease of access to the entire town.

"Most of the people in Georgia have never been to Athens. They know about the University of Georgia because they see it in their communities."

– Jere Morehead
President of the University of Georgia

"From our local Archway Professional to the team in Athens and around the state, they always bring great information to the table about what is working in other communities, as well as the brightest students and faculty in the state"

– Jayson Johnston
WCDA Executive Director

WC CARES

In 2022, Washington County made brain health and mental health priorities. Archway students created a new logo for WC CARES and a mental health resource guide to distribute around the community. In partnership with the College of Public Health and the College of Pharmacy, WC CARES hosted events to inform the community about Alzheimer's and related dementias.

For more information on Archway Partnership in Washington County, contact our Archway Professional.
